## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22, 24-39 and 46-55, drawn to **methods for analyzing body fluids**, classified in class 600, subclass 345.
- II. Claims 40-45, drawn to **a method of testing body fluids and introducing medicament**, classified in class 604, subclass 67.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions each have a different function and modes of operation, and therefore, are not disclosed as capable of use together. Please note that the groups above disclose two different processes that are prosecuted by different art units in the U.S. Patent and Trademark Office. In order to ensure the best possible prosecution results, the examiner of record respectfully requests the applicant to select one of the groups above.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
